

# Indefatigable Justice

Jurists, scholars, medical doctors and historians who share an interest in International Law will be interested in the international manhunt on for ARIBERT HEIM a World-War 2 war criminal.

HEIM, an Austrian medical doctor, is reputed to have performed medical experiments on living individuals without anesthetic during World-War 2.

Legal experts rank HEIM in the same category as MENGELE for unbridled sadism and evil. HEIM engaged in his criminality at the Mauthausen concentration camp in Austria, where he was a Waffen SS supervisor.

One of the worst crimes attributed to HEIM is the cutting out of a prisoner's heart without any anesthetic. He is also reputed to have removed the livers of several prisoners for experimental practice without anesthetic. He is infamous for injecting Jewish prisoners with petrol and timing their resulting death by stopwatch.

This man, one of the worst terrorists and war criminals of the 20th century was released from US custody in 1945 without being charged. He was not a defendant at any of the war crimes trials held in Germany after the war.

He started a new life as a gynecologist in the German town of Bad Neuheim, but disappeared shortly after an arrest warrant was issued for him by West German police in 1967. He was assisted by the secret Odessa organization to disappear into thin air and has not been seen in public since.

In 2001 a German attorney filed tax exemption papers for him in Berlin. Der Spiegel, the German news magazine, found a savings account in his name which had been sending money orders to Spain. The Spanish police have tracked him to Valencia ; however, he has not yet been apprehended.

He is 91 years of age. Interpol has published an enhanced photograph of what he should look like today.

Many questions have been asked about the Heim case. Why was he released by the US Government in 1945? Terrorists come in all shapes sizes and nationalities. They are not restricted to a particular region or skin color.
